

INTERNATIONAL WORKSHOP  
**“New frontiers in Economic education”**

5 November 2022, 10.00AM-11.00AM

Department of Business and Law, U7 building, 4th floor, ROOM “Sala del consiglio”, Via Bicocca degli Arcimboldi 8, 20126, Milano

Several studies have shown that the development of metacognitive competences (i.e. recognising and reflecting on one's own way of learning) enable cognitive awareness and autonomy with regard to learning in different disciplines. In order to acquire metacognitive competences, active teaching methodologies are essential. The workshop will focus on the competence of *learning to learn* and teaching in the field economics and business sciences.

**PROGRAMME**
