

Finance is at the crossroads of modern economies. This statement, widespread in professional and academic circles, attributes to finance the fundamental function to develop and promote an efficient interaction among economic agents.

In fact, individuals come across the financial system either in the financing of financial needs or in daily economic exchanges. Thus, a comprehensive understanding of the financial system and its functioning is at the core of the development and wellbeing of an efficient economic and social system.

Bachelor's Degree in Banking, Insurance and Finance

The degree in "Banking, Insurance and Finance" is a three-year programme designed to provide students with a background of banking, insurance and financial concepts, as well as advanced knowledge and technical skills that allow both practical application in the workplace and the pursue of further education.

The degree in its first two years provides the interdisciplinary skills emphasizing the areas of business management, political economy, quantitative methods and legal studies. In the third year the programme centers its specialization on financial intermediation (banking, stock markets, insurance and investments).

The Bachelor in "Banking, Insurance and Finance" prepares students with the most up-to-date techniques to undertake a wide-array of careers in the financial sectors, as well as to access any Msc courses in Finance around the world.
